PROSPECTUS OF THE "NATIONAL MON-UMENT."

A weekly journal to be published in Washington, under the sanction of the Washington National Monument Society.

JAMES C. PICKETT, EDITOR AND PUBLISHER.

Monument Society.

JAMES C. PICKETT, Editor and Publisher.

The Monument is intended to be a literary, agricultural, and miscellaneous paper. It will contain selections of the literature of the day—the best that can be found in American and English publications; interesting scientificarticles, embracing mechanics; foreign and domestic news; a symposis of the proceedings of Congress, and every thing that such a journal might be expected to contain, with the exception of party politics, which will be at all times most rigorously excluded.

The Monument will be published for the express and the sole purpose of aiding in the erection of the noble column now rising on the banks of the Potomac, in honor of the Father of his Country, and which every one who venerates the name of Washington would rejoice to see completed. After deducting out of the subscription of the subscription will be purpose of the purpose of all who. To willing to contribute to so patriotic an object, and one so wirely national, is carnestly requested. By subscribing to the same interest where the purpose indicated. The aid, therefore, of all who will be obtained, will be it will be doing something, at the same time, towards completing that majestic memorial of the Sation's gratitude.

The Heart of Managers recommend Mr. Pickett, formerly Fourth Anditor of the Trensury and Charge d'Affairs to Peru, who proposes to edit and publish the Monument journal, as one well qualified to perform the duties of editor, and to conduct the paper fathfully, and satisfactorily to the subscribers. They assure their fellow-citizens that this enterprise is not a speculation get up for individual emolument. Mr. Pickett will make the experiment with his own means and at his own risk; if successful, he will receive nothing more, and he asks nothing more, than a very moderate compensation for his services. N

The pertunaters, and secretaries of all organized bodies throughout the Union, are respectfully requested to act as agents in obtaining subscriptions, thus aiding the great object of our exertions.

As all editors and publishers, on account of the object for which the Monument newpaper will be established, must wish it to succeed, it is hoped that they will contribute to its success by publishing this prospectus.

All moneys will be remitted, and all letters and moneys addressed prepaid, to the general agent of the Monument Society, Hon. Elisha Whittlessy, Washington.

Organizas—Millard Fillmore, exoficio President; Arch. Henderson, First Vice President; Walter Lenox, (Mayor of Washington,) Second Vice President; Thos. Carbory, Third Vice President; J. B. H. Smith, Treasurer; Geo. Watterston, Secretary.

copies, \$10; &c.
Those who are disposed to patronise the MONUMENT are
requested to forward their names to the General Agent,
without delay. The first number will be published early in May, and the second on the second day of Angust, and weekly thereafter; time being allowed for the Prospectus to be circulated, and for the agents to make returns. As all subscribers will be contributors to the Monument itself, their names will be published in the paper.

WILMINGTON BOARDING SCHOOL FOR BOYS.—This institution to situated in one of the healthiest parts of the city of Wimington, entirely beyond the settled portions of the town. The uniform healthfulness of the location may be inferred from the first that, since the establishment of the School, about twenty-eight years, very few cases of serious indisposition have occurred among the pupils, and not a single death either here, or from diseases contracted while here.

The course of instruction includes, besides the ordinary English branches, Natural Philosophy, Chenistry, Physiology, History, Rhestoric, the various branches of Mathematics, and the Latin, Greek, and French Laz guages. Particular attention is paid to the higher Mathematics and their application to Mechanics and Engineering; the latter and Surveying are taught practically by field operations, with the use of appropriate instruments. Lectares on Natural Philosophy and Chemistry, in which all the important principles are illustrated by experiments, are regularly delivered before the students.

As the object is to make the instruction as thorough and practical as possible, no expense has been spared in providing suitable apparatus. It is believed that, in this respect, the Institution will compare favorably with any similar one in the country. A carefully selected library, of more than one thousand volumes, containing works on the various branches of Literature and Science, furnishes ample reading matter; while a Laboratory, fully supplied with apparatus and tests, contains all that is necessary for practical instruction in Chemical Manipulation.

The school year commenced on the third Second-day (Monday) of the Ninth month (September,) and is divided into four quarters of eleven weeks each, leaving a vacation of two months, from about the middle of the Seventh month (July).

MORE HOME EVIDENCE. THE TESTIMONY OF ONE OF OUR LAWYERS.
Mr. JAS. L. HAMILTON—DRAB SIR: Although t number and respectability of the testimonials of which you are already in possession, as to the efficacy of you Medicine, "THE GREAT VA. REMEDY," in the discusse you are already in possession, as to the efficacy of your Medicine, "THE GIRAT VA. REMEDY," in the diseases which it is designed to cure, are sufficient, in my opinion, to establish its reputation, and secure for it such patronage as will adequately reward you for the discovery of so inestimable a Medicine—yet the great benefit which I have derived from its use, and the salutary effects which I have witnessed from its employment in the cases of several friends, to whom I had recommended it, constrain me to contribute, for such use as you may think proper to make of it, this formal acknowledgment of its sanitary virtues. My own case was Dyspepsia of long duration, and very aggravated in its character, manifested by an almost total destruction of the digestive functions, great deblity, nervousness, emaciation, and inpaired appetite, with pain, and a burning sensation in the left side of the chest, palpitation of the heart, vertige and congestion in the head, and mr y other symptoms indicative of the worst type of the disease, by the use of three or four bottles of your preparation, been entirely relieved. The cases of my friends, in which your Medicine was taken, were Dyspepsia, Chronic Headsche, and Sore Threat, in all of which it proved efficacious, after the trial of a vast number of other remedies without benefit. Your medicine is as pleasant to the taste as a cordial, and in my experience corrects all derangement of the stomach, restores the wasted or enfeebled energies of the digestive organs, and imparts strength and reanimation to the whole system.

Very respectfully, yours, &c.,

Gentlemen.—In reply to your letter, I can with greating entry say, that I entertain a very high coining of the sincerity say, that I entertain a very night opinion recent Exchequer Reports. In my judgment they are not excelled by any cotemporaneous Reports, in learning, ability, or general utility and interest. The cases decided are discussed with great care, and expounded with uncommon force. I scarcely know of any volumes which I deem of mote importance or value for a Professional Library.

JOSEPH STORY.

CAMBRIDER, January 25, 1845.

Gentlemen: Your letter of the 24th has been received, in which you ask my opinion as to the value of the English Exchequer Reports, from Frice downwards to this time, to an American Lawyer, and as to the expediency of reprinting them in this country. Of the high value of these Reports, both on the Pleas and Equity sides of the Court, I have not the least doubt—the decisions of this Court for the last filteen or twenty years, both at Equity and In Common Law, being entitled to equal respect with any others in England. I should think an American Lawyer's Library essentially incomplete without them.

I am, gentlemen, very respectfully yours,

The different locks will be submitted to a commission for examination and report. Upon this report, contracts will as soon as practicable, be entered into for furnishing such locks and keys for four years, with the right on the part of the Postmatter General, for the time being, to extend and continue the contract in force for an additional term of four years, by giving to the contractor a written notice to that effect, not more than nine nor less than six months before the termination of the first term of four years.

written notice to that effect, not more than nine nor less than six months before the termination of the first term of four years.

With a view of procuring the best lock at the lowest price, no kind of lock is prescribed as a standard, the bepartment relying for a selection on the mechanical skill and ingenuity which a fair competition, now invited, may develop. It is, however, preper to state that a lock suitable for the mail cervice should possess the following qualities, viz. durability, uniformity, lightness, and strength. For the purpose of displacing simulianeously all the mail locks and kwenty thousand keysadapted thereto will be required to be furnished by the contractor within seven menths after the contract-shall have been entered into; afterwards the anomal supply will depend on the durability of the locks and keys adopted, as well as the increase of the unil service; but it will probably never exceed in amount three thousand of the former and one thousand of the latter.

No lock will be considered if it be like any already in general me; nor will any one with whom the contract may be made be allowed to make, all, or furnish, any lock or key similar to those contracted for for any other purpose or use than that of the Post Office Department.

The kind of lock adopted must be patented, and the patentee will be required, on entering into contract, to make an assignment of his patent for the exclusive use and benefit of the Department, if the Festimaster General shall deem such requirement essential to the interests of the service. In case of the failure of the contract on any time to faith failthfully the terms and conditions of his contract, the Postmester General shall have the right, besides a resort to the penal remay horeinafter mentioned, to annul said contract, and to contract anew with any other purpor parties as he may see fit, for furnishing similar locks and keys.

besides a resort to the penal remedy horeinafter mentioned, to annul said contract, and to contract anew with any other party or parties as he may see fit, for furnishing similar locks and keys.

In deciding upon the proposals and specimens offered, the Postmaster General may deem it expection to select for the through mails the lock of one bidder, and for the way mails that of another. He reserves, therefore, the right of contracting with different individuals for such different kinds of locks as he may select, and also the right to reject all the specimens and proposals, if he shall deem that course for the interest of the Department. The party or parties contracting will be required to give bond, with ample security, in the sum of thirty thousand dollars, for a faithful performance of the contract. The contract is to contain provisions for the due and proper inspection of the locks and keys, and also for guarding against their passing into improper hands; the terms of these provisions to be arranged between the Department and the successful bidder, if a bid should be accepted.

No application will be considered if not excompanied with satisfactory evidence of the treatworthy character of the bidder, and of his ability to fulfil the contract.

ASHLAND, 20th July, 1849.

Dear Sir: I wish to express to you the gratification I derived on receiving the July number of the Microhants' Magazine and Commercial Review, from viewing your portrait in the beginning, and from reasing your address to your friends at the end of it. When we feel under obligations to those who have contributed to our information and amusement, we are naturally desirous to peases all the knowledge of them, of their appearance, of the features of their countenance, and of the character and habite of their mind, which we can acquire. You have placed your numerous readers (at least you have me, if I may not speak for them) under those obligations; and the number of your valuable work now before me, in sema degree, satisfies the desire to which I have alluded.

I have become quite familiar with the Magazine and Review, and have no hesitation in expressing my humble opinion that it is eminently entitled to the public regard and support. It collects and arranges, in good order, a large amount of valuable statistical and other information, highly useful not only to the merchant, but to the statement, to the cultivator of the earth, to the manufacturer, to the mariner, in short, to all classes of the business and reading community.

Entertaining this opinion, I am glad that it has been, and hope that it may continue to be, liberally patronized.

Offering you cordial assurances of my esteem and regard, I am truly your friend and obedient servant.

Extract of a letter from Hon. Millard Fillmore.

"I have read it (Merchants' Magazine) with a good deal of attention, and have no hesitation in snying that I think it one of the mest valuable periodicals that was ever published. To the merchant it seems quite indispensable, and to the statesman and man of general information almost equally desirable. It is a grand repository of useful facts and information, which can be found nowhere so well digested and so accessible as in these numbers. I only regret that I do not own the whole work."

Mr. Freeman Hunt.—Sir: I owe you many thanks for the opportunities I have had to read the Merchanits' Magnazine, and have found it in reality to be a magnasine, and that well replemished, of all the useful matter which the title would imply, and presented with a follows and clearness which delights while it instructs. It is, in fact, a merchanis' magazine in the large acceptation of the term—merchanis who go between nations, whose large operations bring many departments of knowledge, and a view of the state of the world, into daily requisition. But it is not the great merchant only, but the one of more modest, but, nevertheless, of most useful operations—the merchant of the interior also—who will find this magnazine to abound with the information the pursuit of his business and the elevation of the mercanitic character requires. Nor is its utility at all confined to merchants, but extends to the legislator and diplomatict, and to all who are charged with managing the affairs of the nation. For myself, I have found it most useful to me in my senatorial labors, and have been in the habit for many years of earefully consulting it.

An sulightened public sentiment has everywhere repudiated a reckless use of drugs in the treatment of disease; while intolerable sufferings and broken constitutions have imperatively demanded "Reform." A return from a wide and fatal departure from the simplicity of Nature's laws is called for, slike by a rational love of happiness and the deplorable exigencies of our condition. Hydropathy, or a scientific use of water as a restorative and curative agent, is a practical substitution of a simple and remarkably efficacious mode of curing the sick; for that system of drugging, depleting, and cauterising, which, in obteining the mastery over disease, too frequently places the patient beyond the reach of further annoyance. The success of the various Water Cure establishments in this country, to say nothing of any other, has fully confirmed the hopes of the carly discoverers and promulgators of the great truths upon which the system is founded, and renders verbal communications unnecessary. It is deemed sufficient to say, that the "Cold Spring Water Cure" will compare favorably with any of the well-conducted entablishments of a similar character, and will be found equal to the best, as regards the order, convenience, and desirableness of its arrangements. The institution is now open for the reception of patients, and in full operation.
